index.html
Guest / Student context

Student login

[Page] Login Page
login.html
Guest

(Feature) Email + password / validation
Credential authentication

[Page] Student Home Page
index.html
After Student login

[Page] Explore Page
browse.html
Authenticated public reports

(Feature) Search / type / filters / cards
Discoverable controls

[Page] Item Detail Page
item.html
Public gallery / status / matches

Eligible Student

[Page] Claim Page
claim.html
Student only

(Feature) Answer / own Lost link / private proof
Explicit submit / resubmit

[Page] Report Item Page
report.html
Student only

(Feature) Lost / Found / eligible edit
Public media vs private clue/proof

[Page] My Activity Page
my-reports.html
Own records

(Feature) Reports / Claims / Closed / resubmit
Outline Edit / confirmed Delete; pickup status

[Page] Campus History Page
history.html
Read-only

[Page] Notifications Page
notifications.html
Own notifications

[Page] Profile Page
profile.html
Own account

(Feature) View / edit display name
Email/NIM/role readonly

[Page] Account Settings Page
settings.html
Own account

(Feature) Change password / logout
Persistent backend operations

BM login

[Page] BM Review Queue Page
admin.html
After BM login

(Feature) Reports tab / status / archive
admin.html?tab=reports
Eligible status / Lost recovery; &report=ID

(Feature) Claims tab / private evidence
admin.html?tab=claims
Synced filters; focused &claim=ID; mobile Back to queue

(Feature) Handover tab
admin.html?tab=handover
Schedule / reschedule / cancel / complete; &handover=ID

[Page] History / Archive Page
history.html
Operational read-only outcomes

[Page] Notifications Page
notifications.html
Own notifications

[Page] Profile Page
profile.html
Own BM account

[Page] Account Settings Page
settings.html
Own BM account

(Feature) Edit name / change password / logout
Shared account capability

ERD02 · Reference / location relations · As-built / B06
14 actual tables; ! NOT NULL / ? nullable; REF = other sheet; full fields/constraints in dictionary

FC01 · Login, session, logout

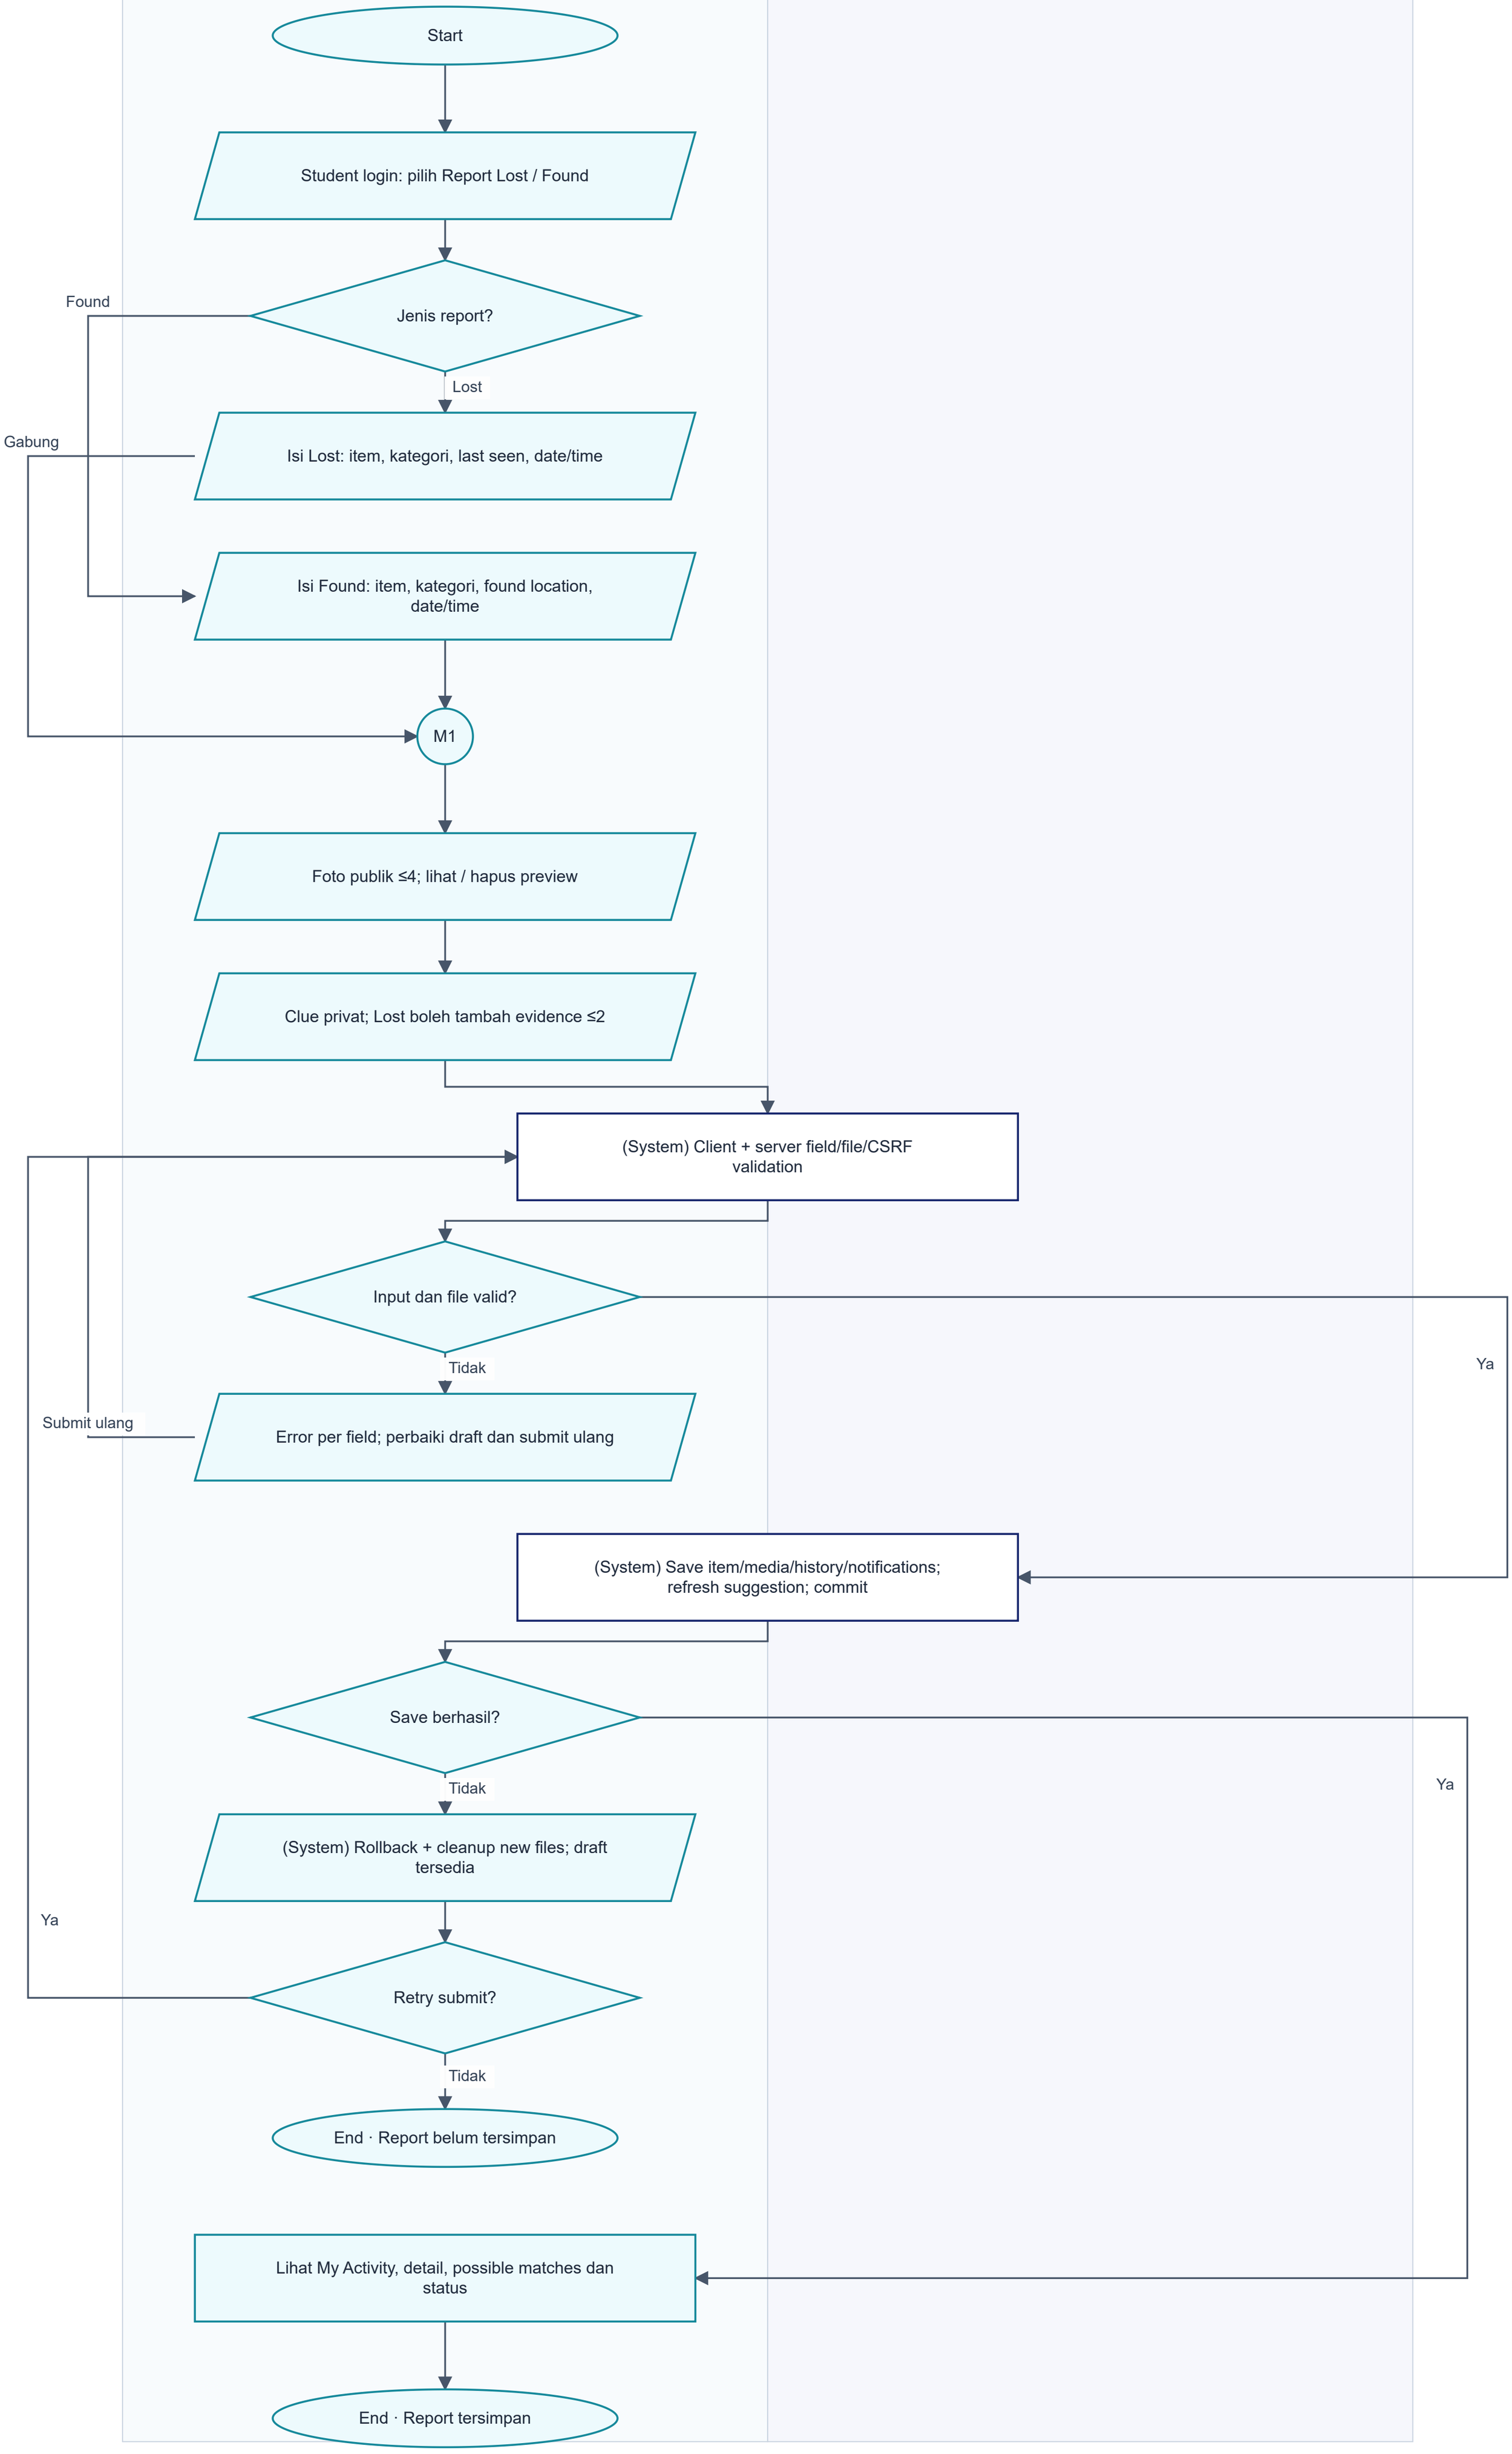

As-built / B06 · Login / session / logout

Shared blocks digunakan kedua aktor. Role berasal dari DB; Login tidak meminta pilihan role. Selesai skenario tidak otomatis logout.

FC02 · Student Lost / Found submission

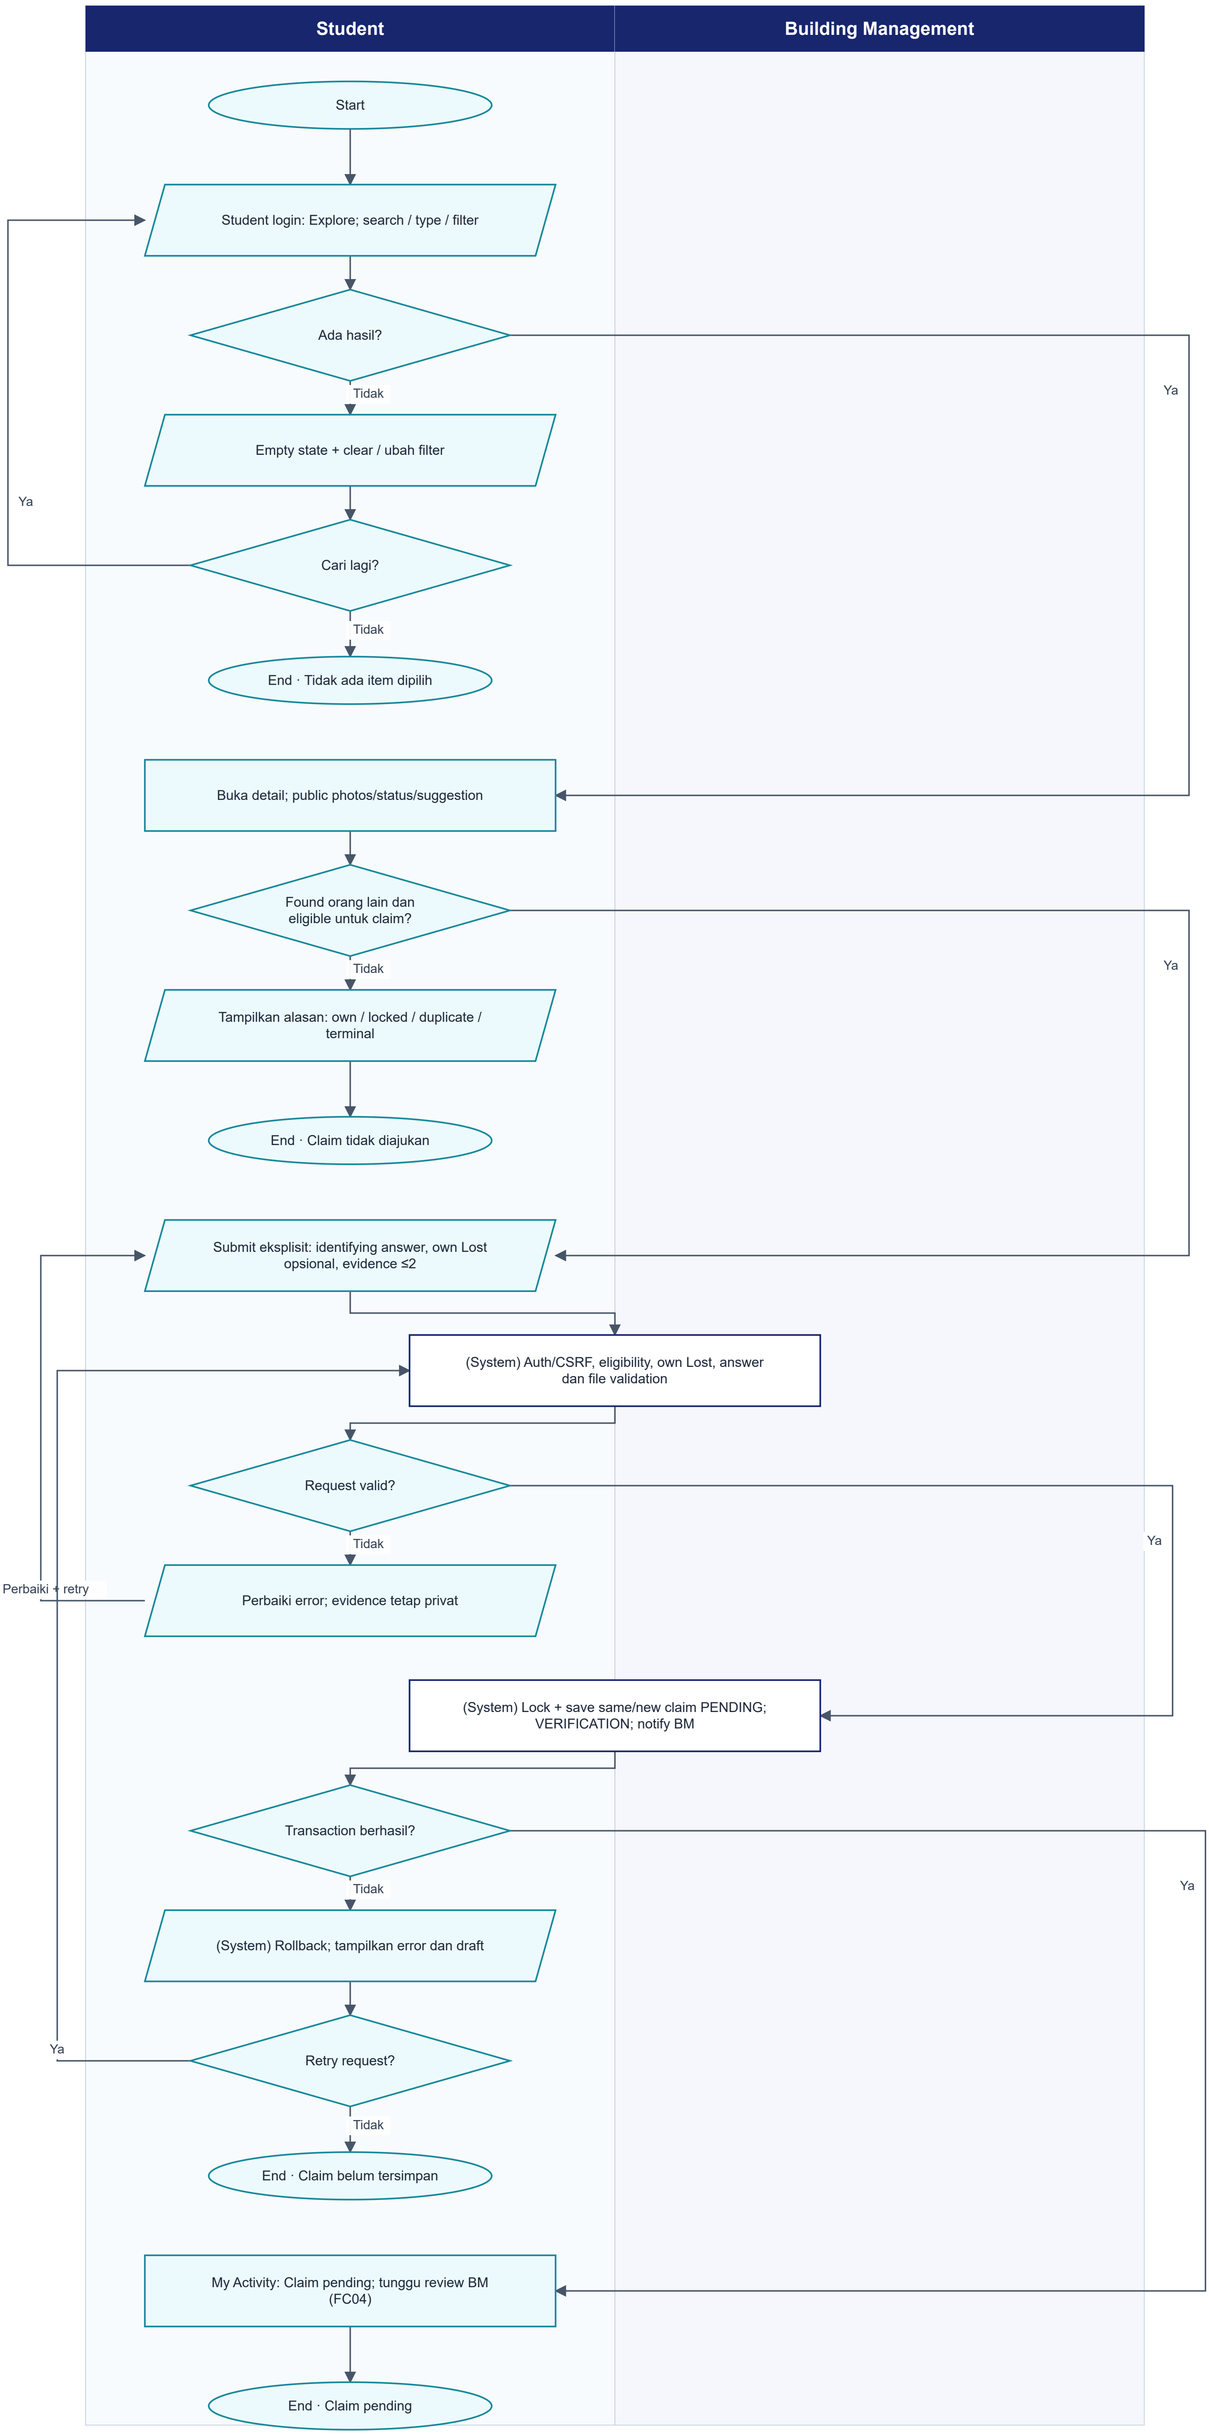

As-built / B06 · Student submit Lost / Found

BM tidak melakukan aksi dalam submission ini; operational review dilanjutkan FC05. Found tidak menerima ownership-photo collection.

FC03 · Browse → ownership claim

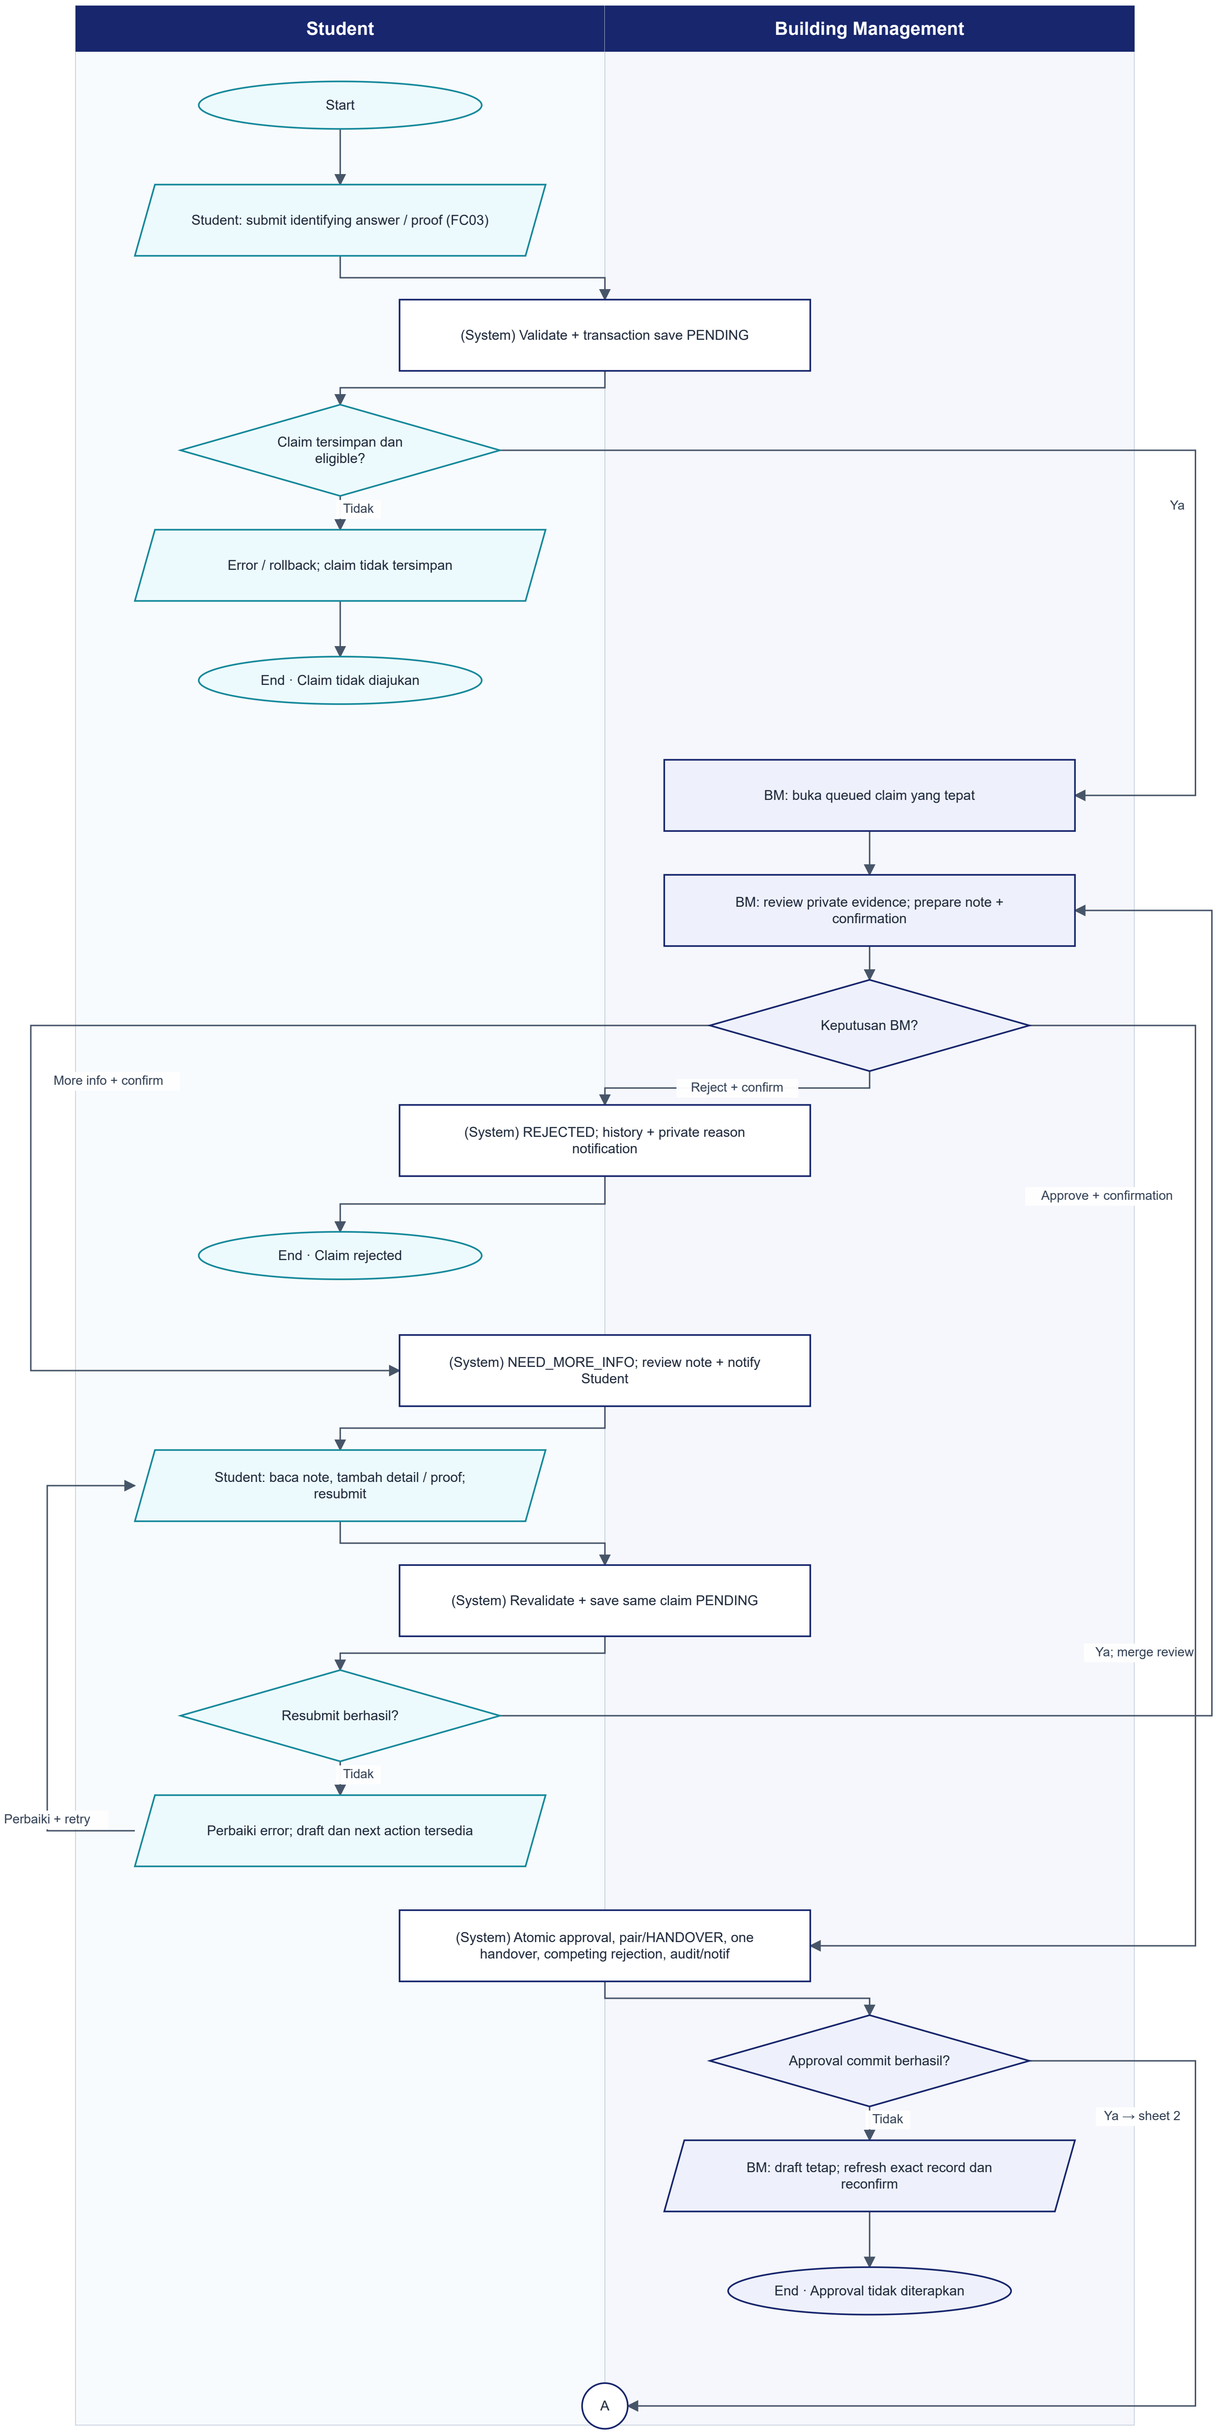

As-built / B06 · Student discovery dan claim

Claim bukan gesture swipe. BM review terdapat di FC04; foto/clue ownership tidak tampil di discovery.

FC04 · Claim review dan handover

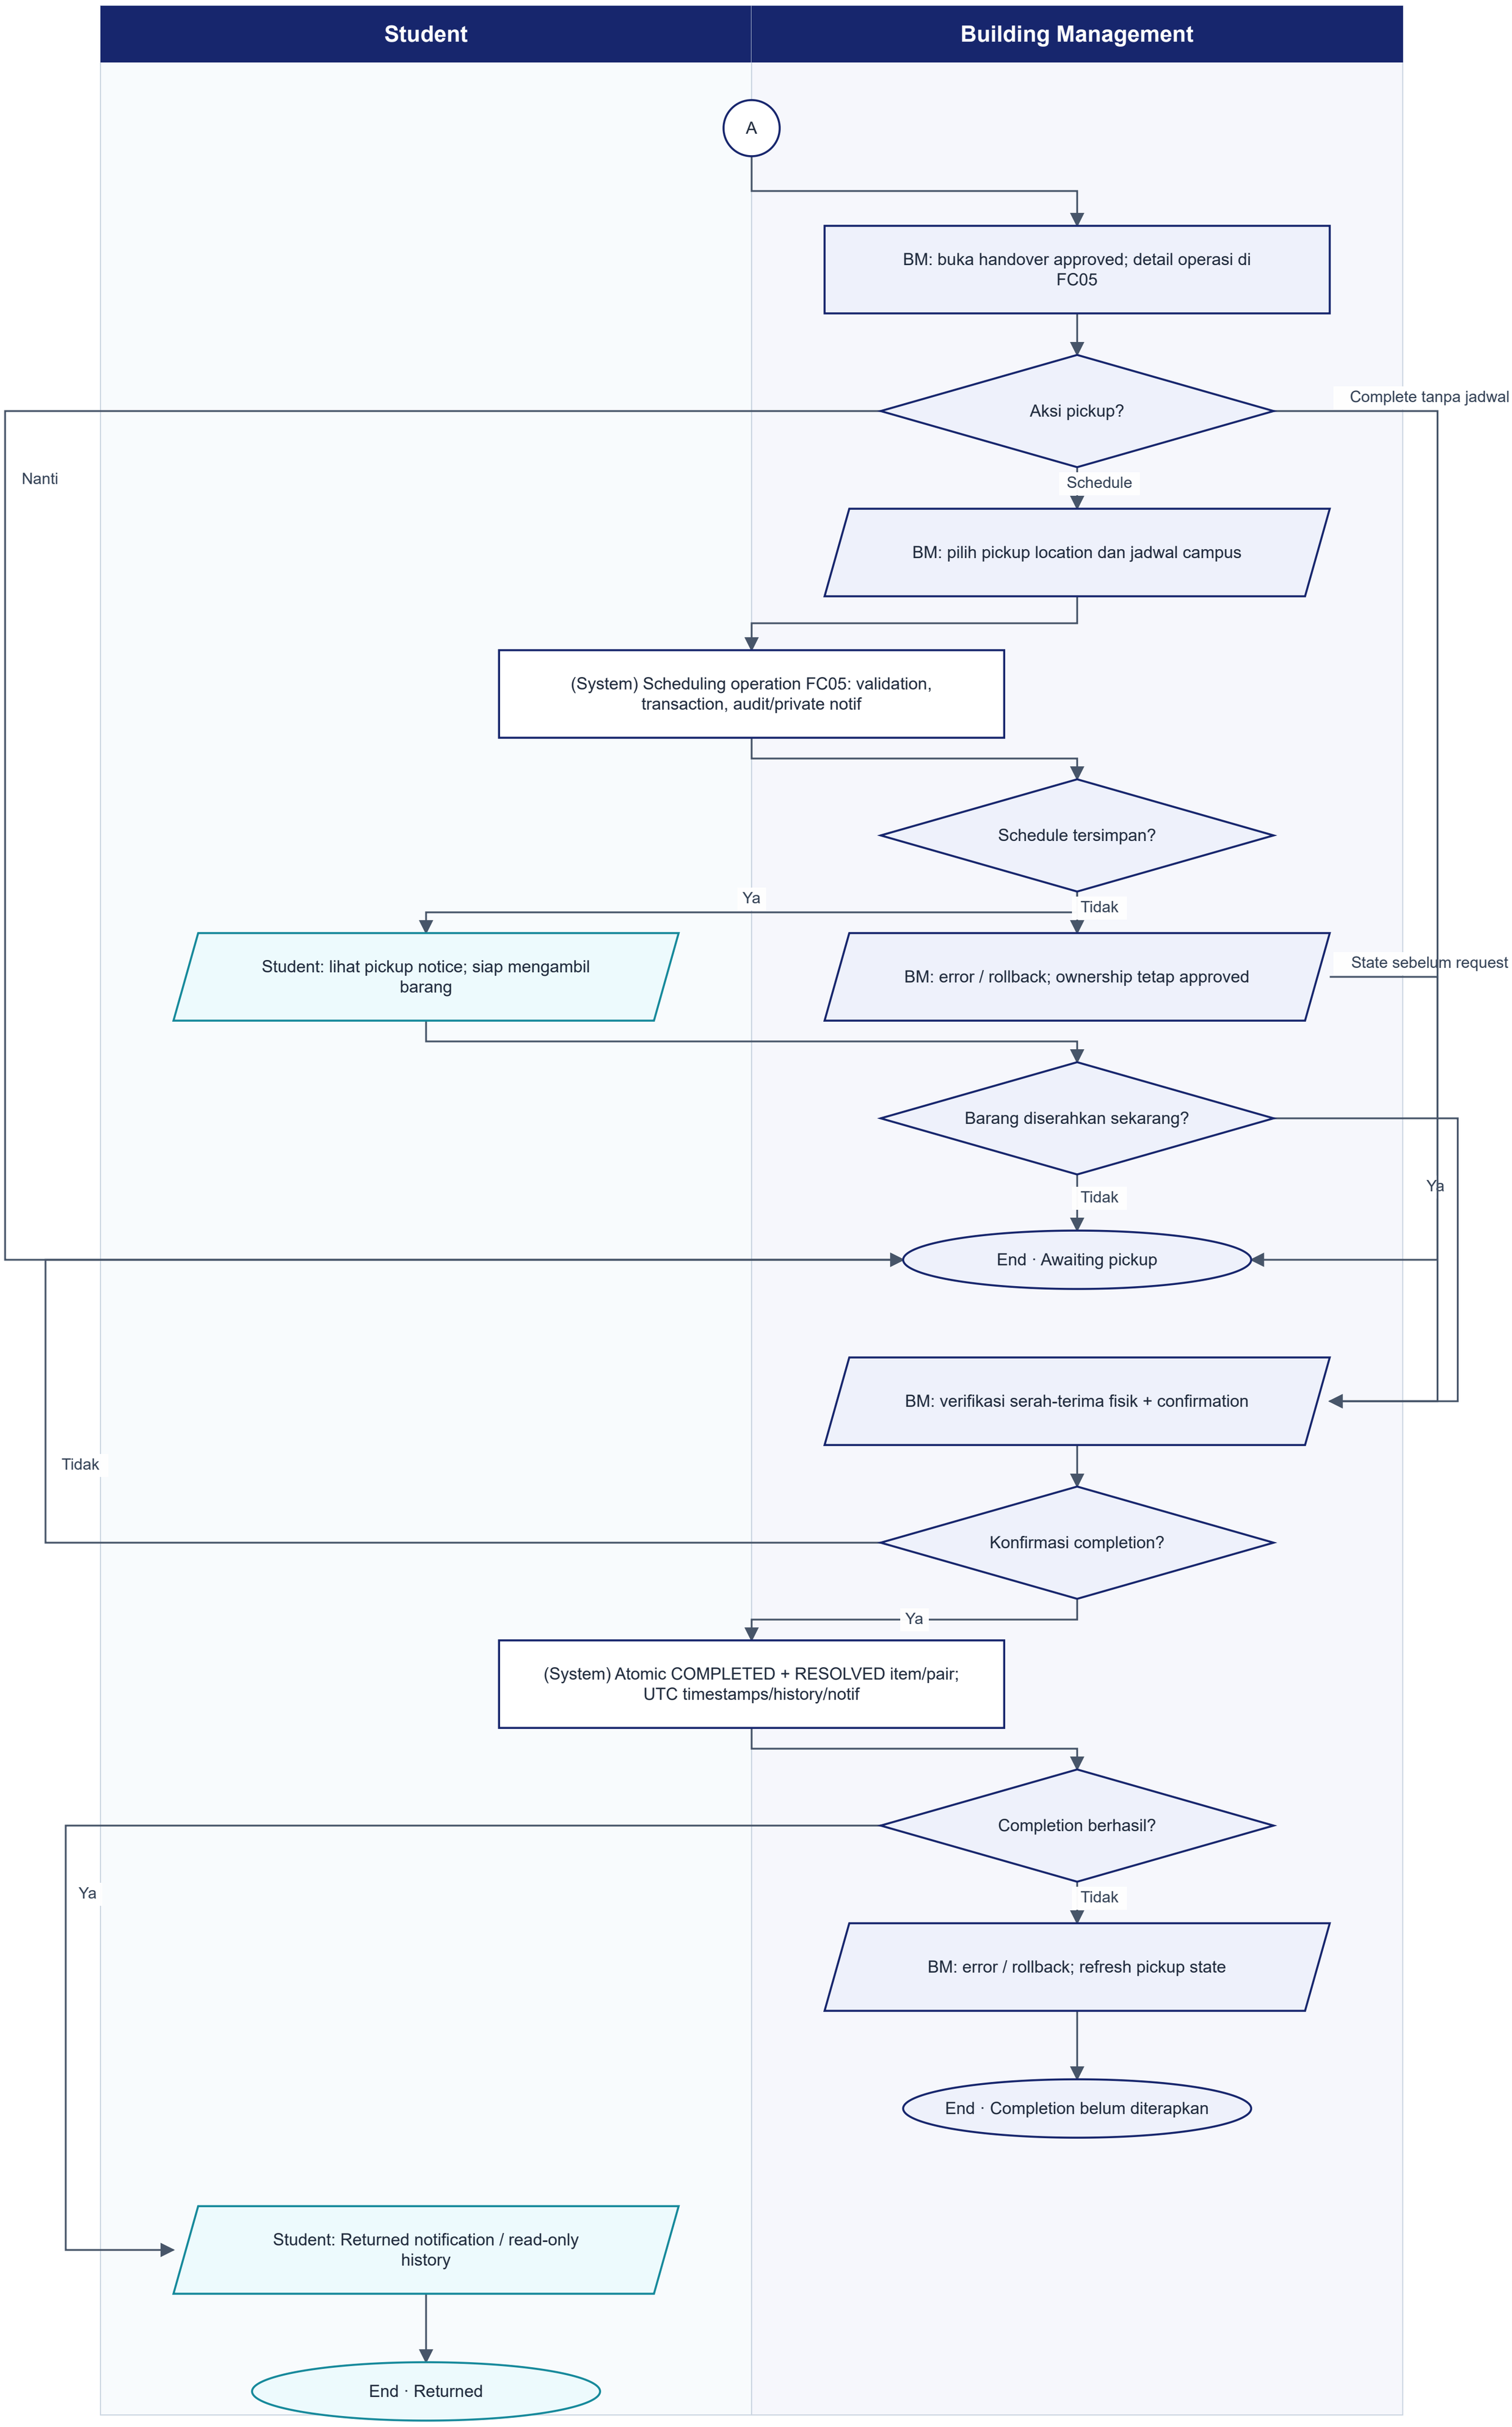

As-built / B06 · Sheet 1 · Claim review / resubmit

Semua keputusan: note 8–500, CSRF, confirmation, fresh revision/state di bawah lock; error/409 mempertahankan draft dan explicit refresh. A ke sheet 2; resubmit merge ke review.

FC04 · Claim review dan handover

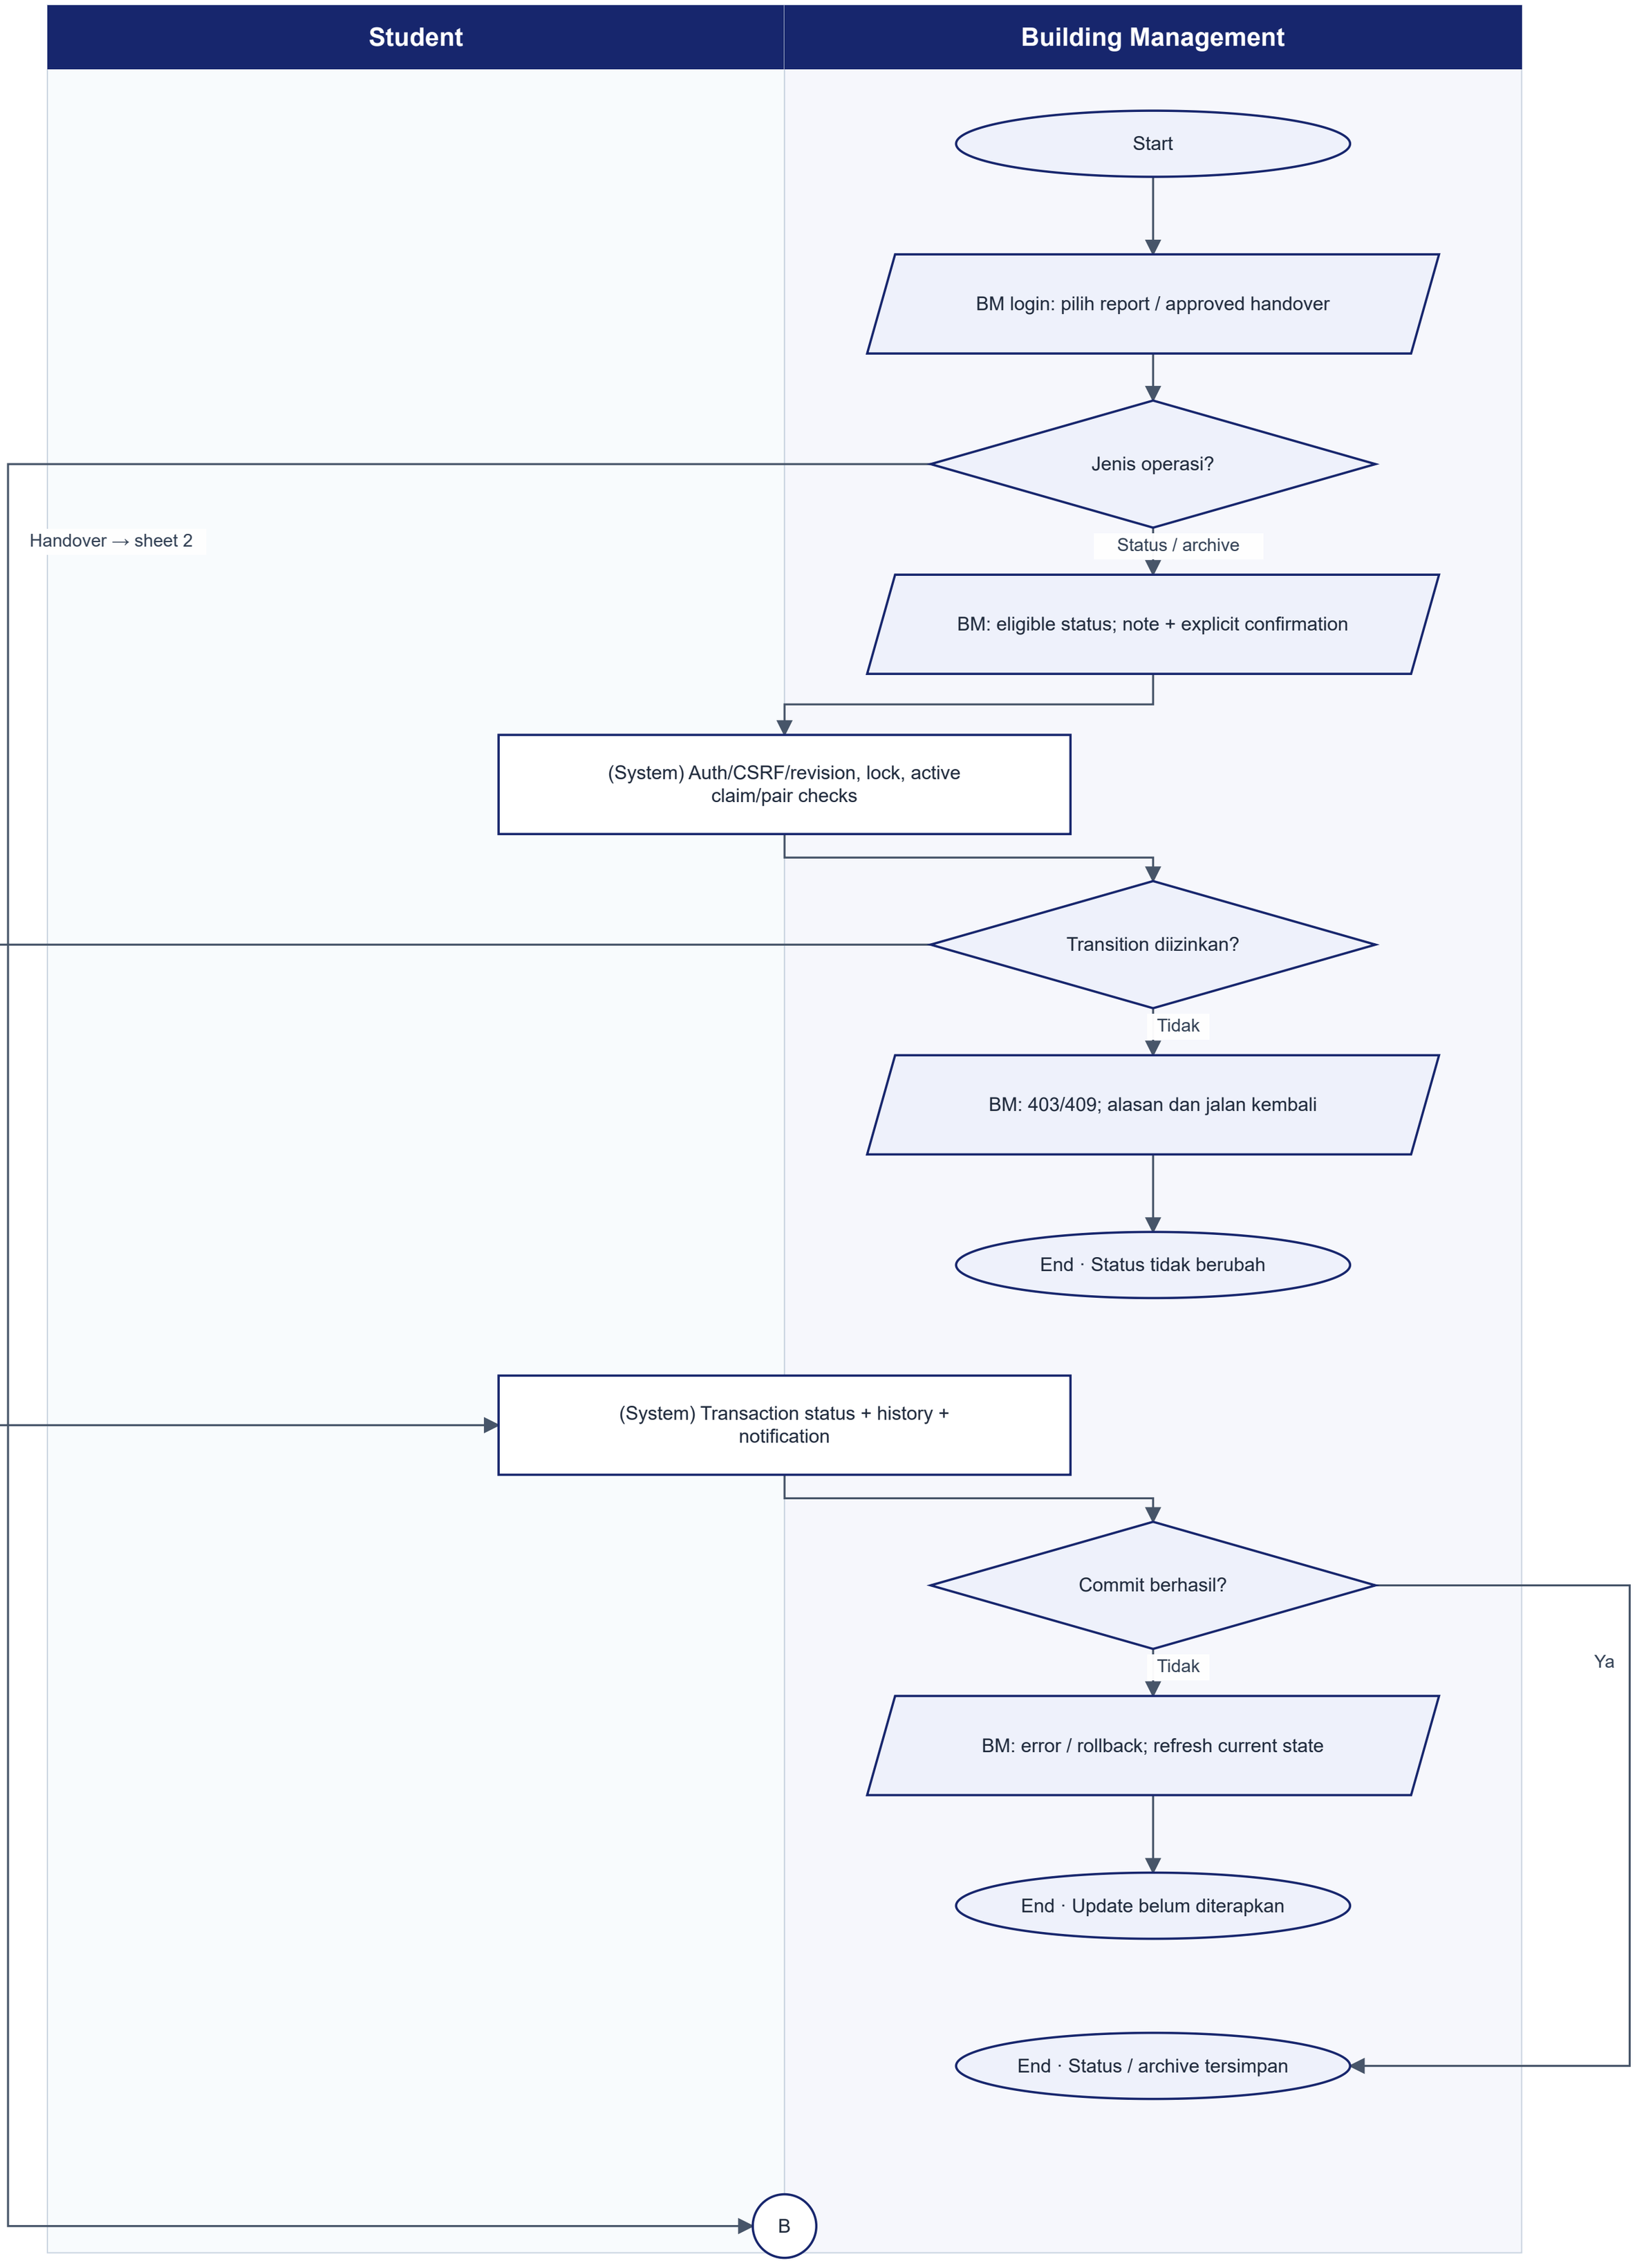

As-built / B06 · Sheet 2 · Approved → pickup → returned

A berasal dari sheet 1; tidak ada Start baru. Schedule validation/conflicts, reschedule dan cancel_schedule lengkap di FC05. Awaiting pickup bukan status terminal DB.

FC05 · BM status, archive, pickup operations

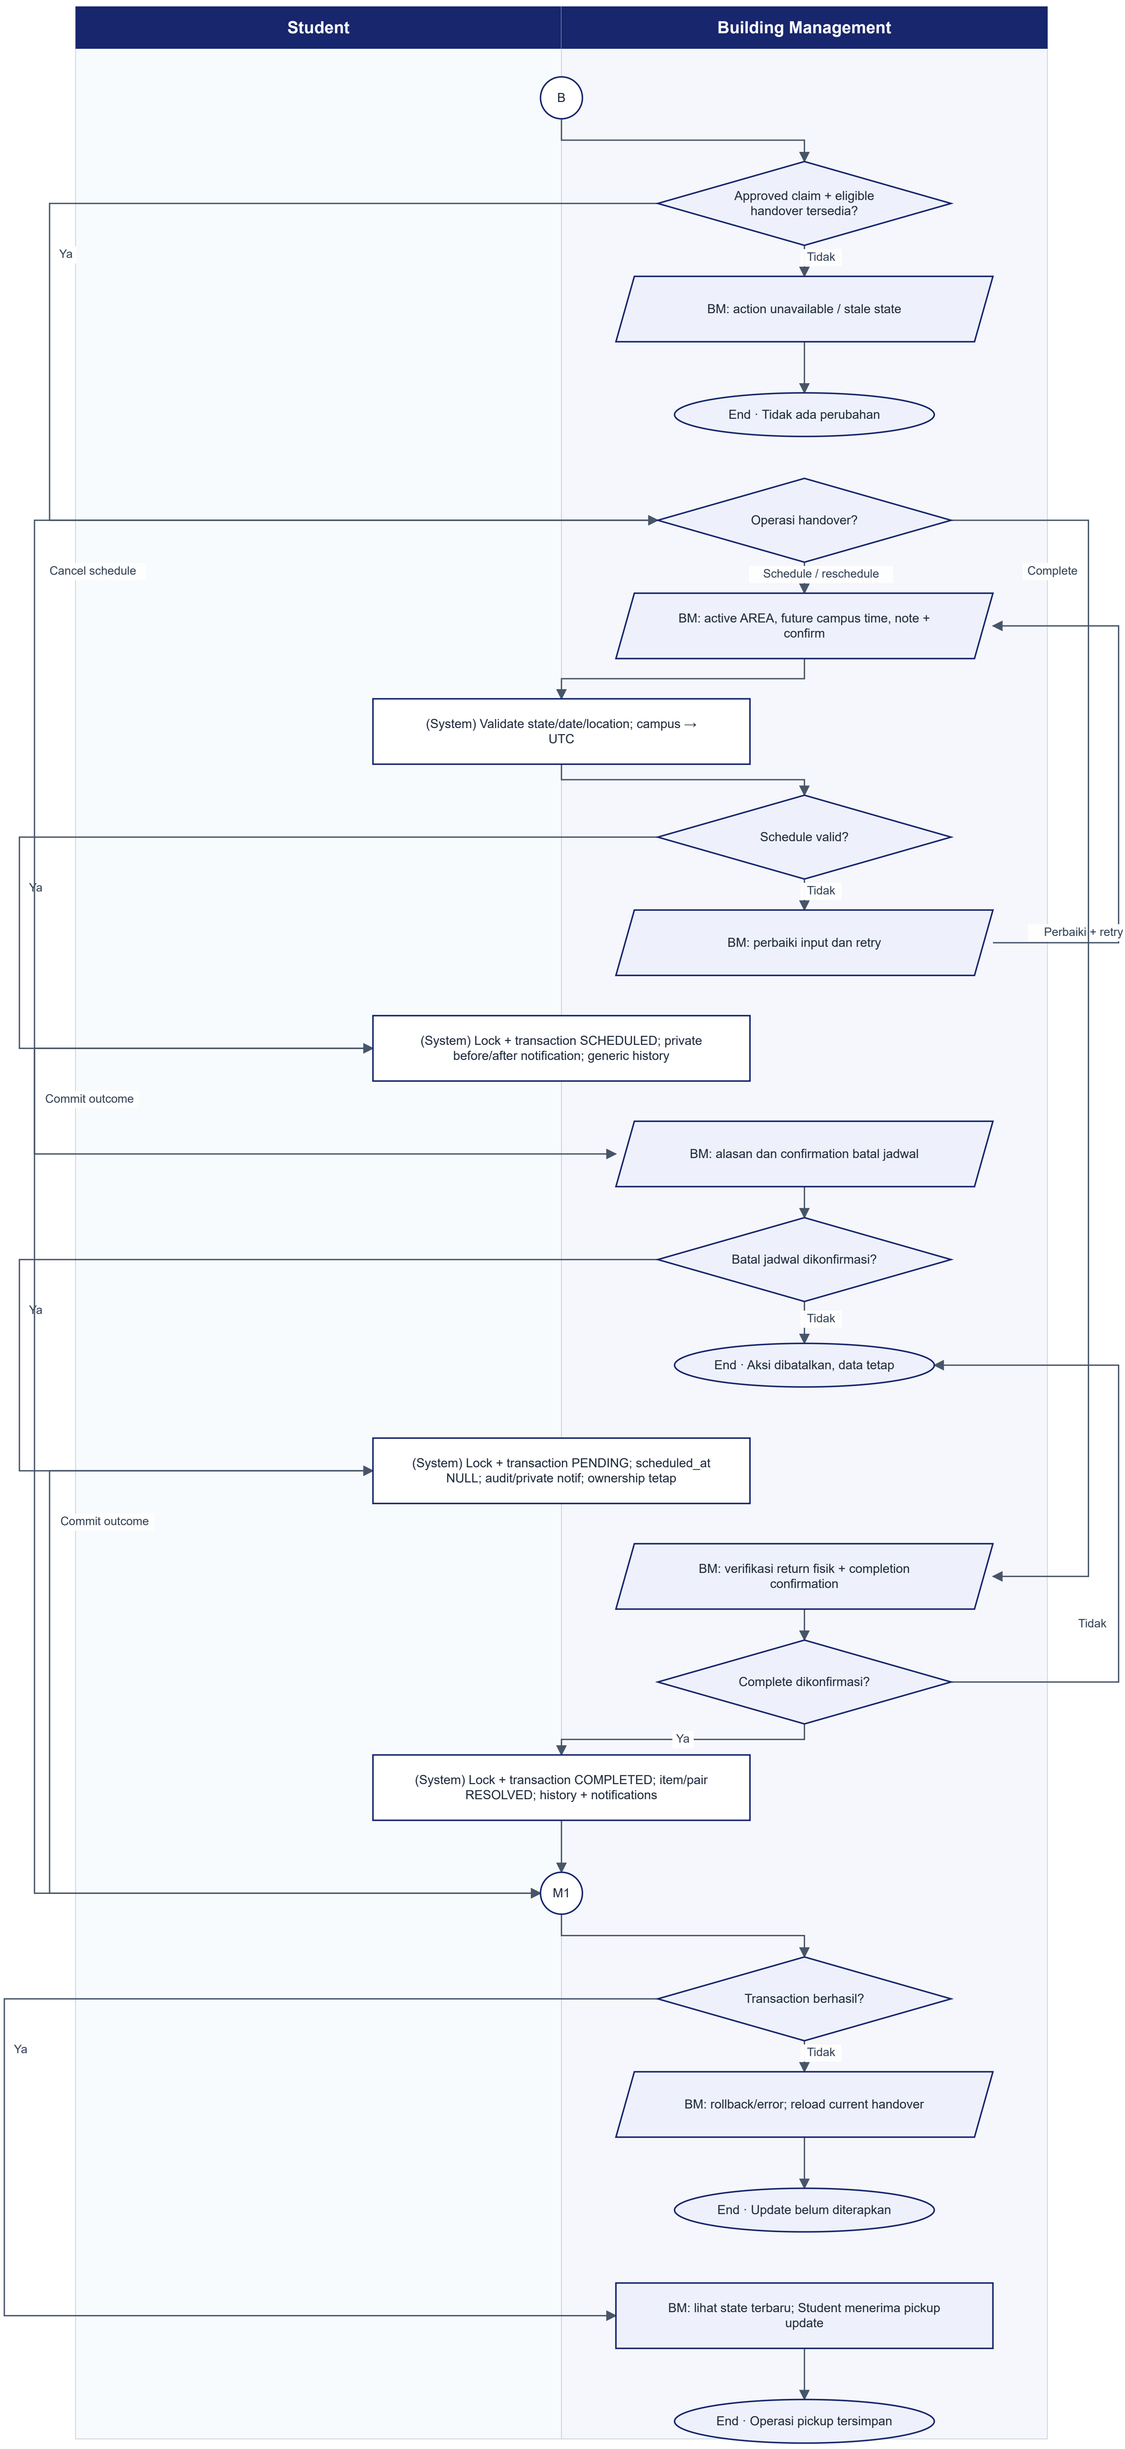

As-built / B06 · Sheet 1 · Operational status / archive

Found Returned wajib handover; unlinked Lost recovery boleh manual. Note 8–500 + confirmation/revision. Terminal read-only. Connector B ke pickup sheet 2.

FC05 · BM status, archive, pickup operations

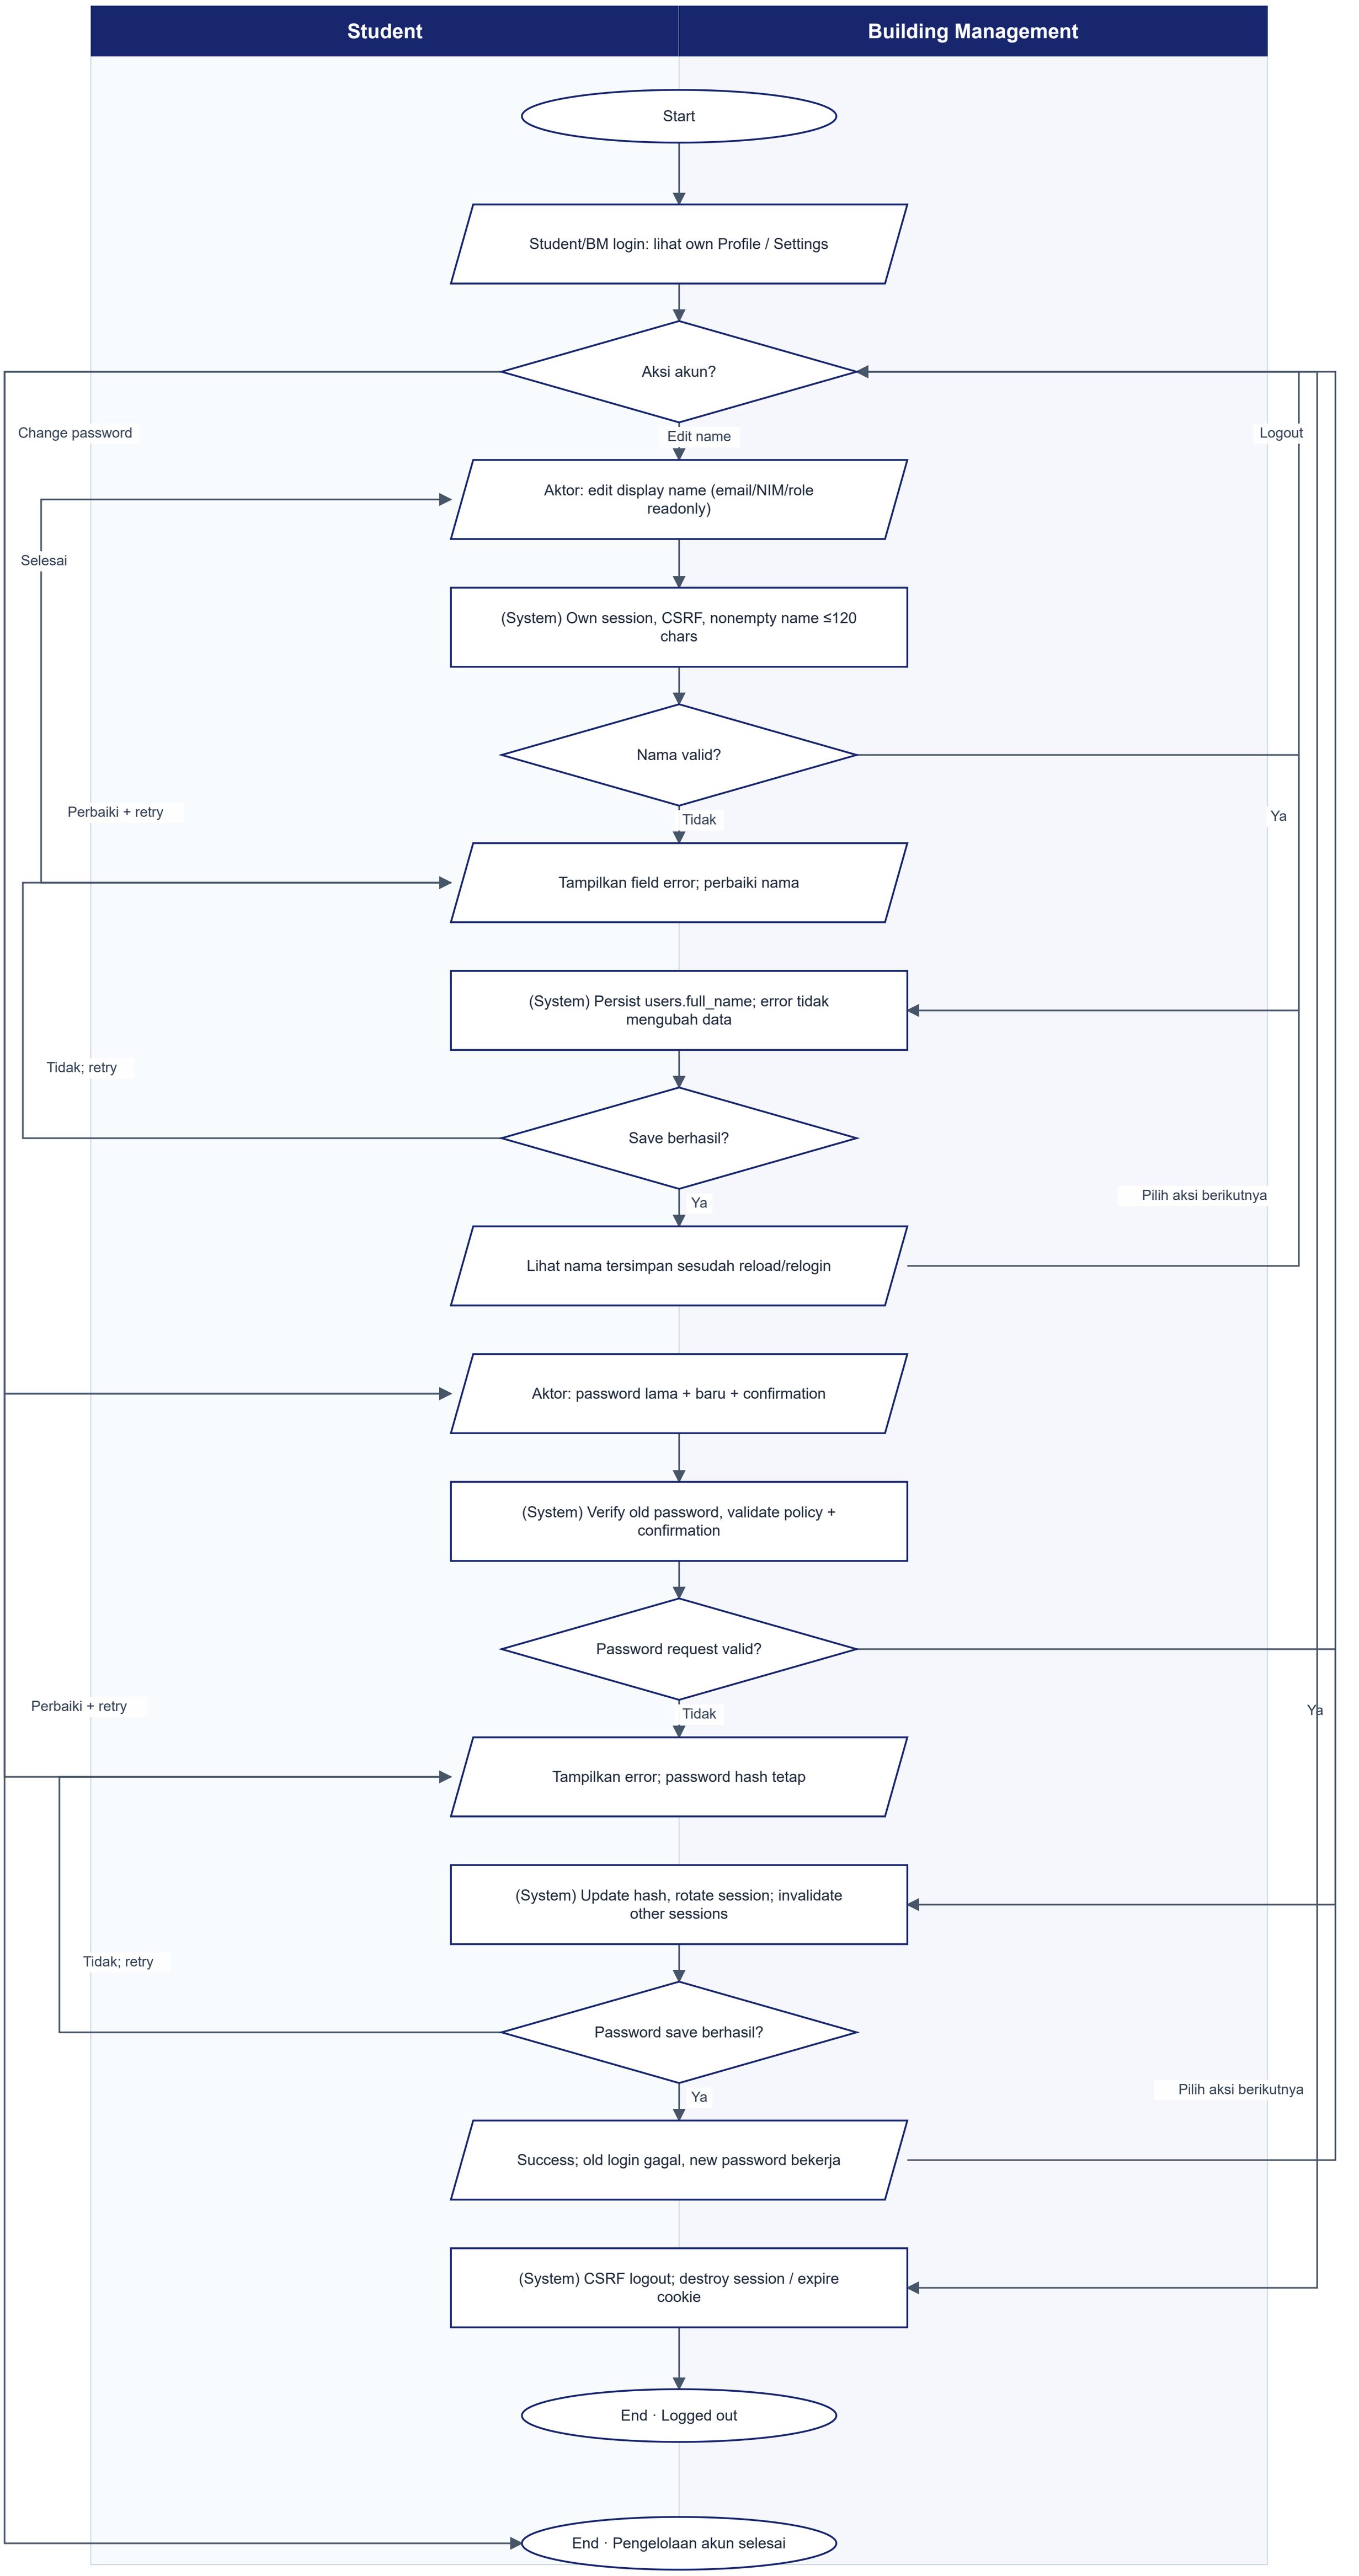

As-built / B06 · Sheet 2 · Schedule / reschedule / cancel / complete

Cancel jadwal: SCHEDULED → PENDING; ownership tetap. Reason reschedule/cancel 8–250; unchanged reschedule 409. Semua operasi memeriksa fresh revision/state di bawah lock.

FC06 · Own profile dan account settings

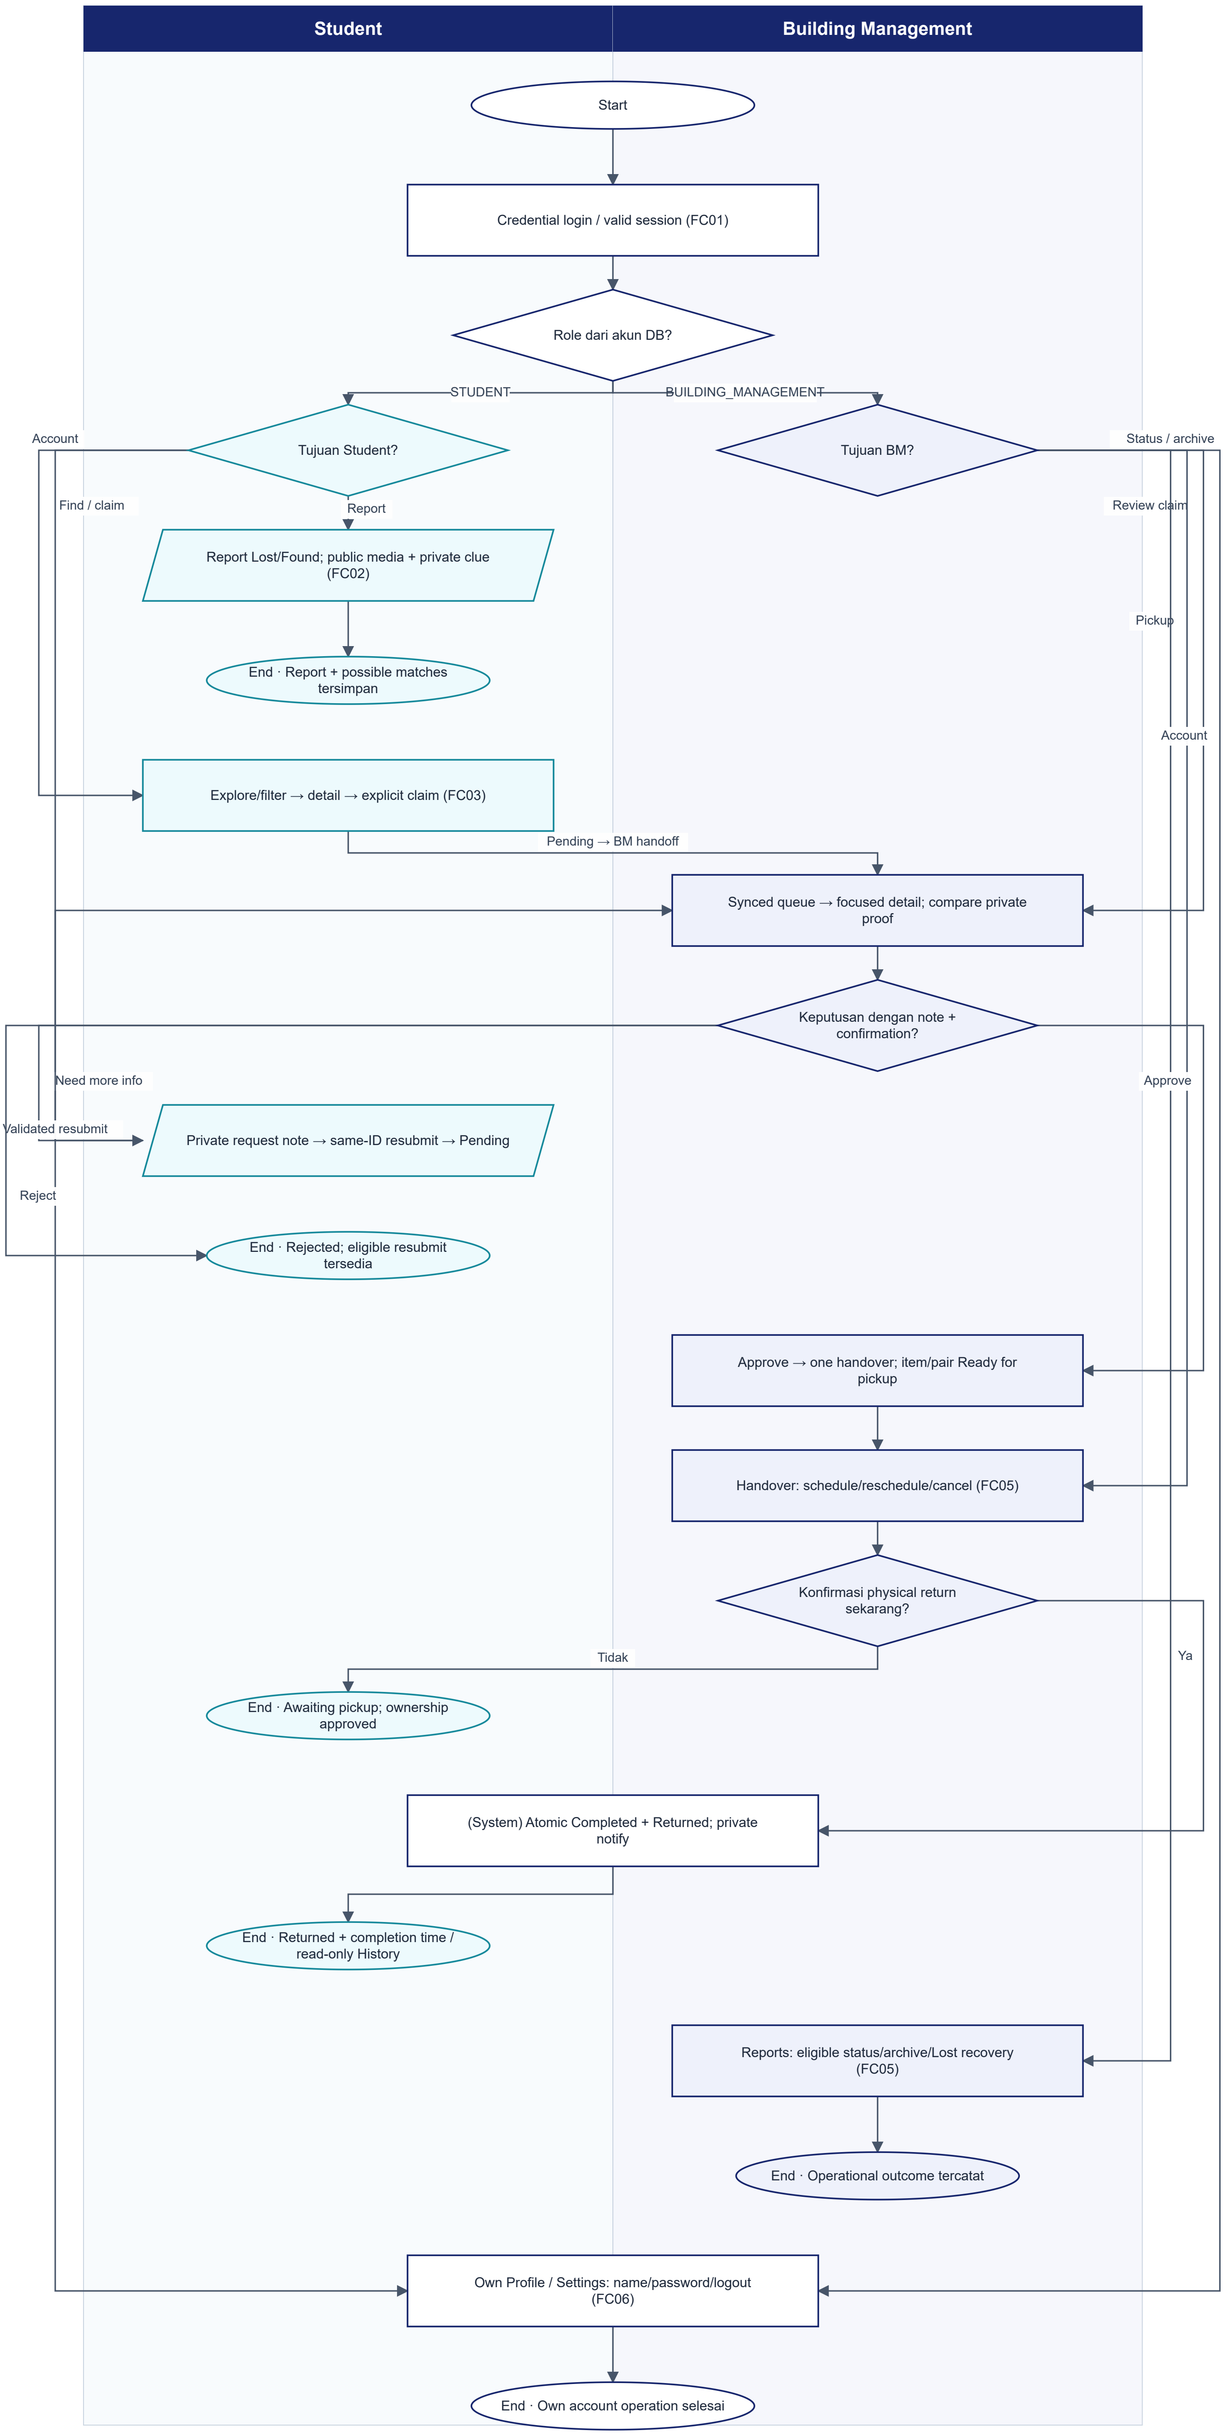

As-built / B06 · Profile / password / logout untuk kedua aktor

Profile/settings adalah fitur kedua aktor: shared blocks melintasi batas lane. Auto work ditandai (System). Request expired/forbidden kembali ke kontrak FC01.

UF01 · Student / BM user flow

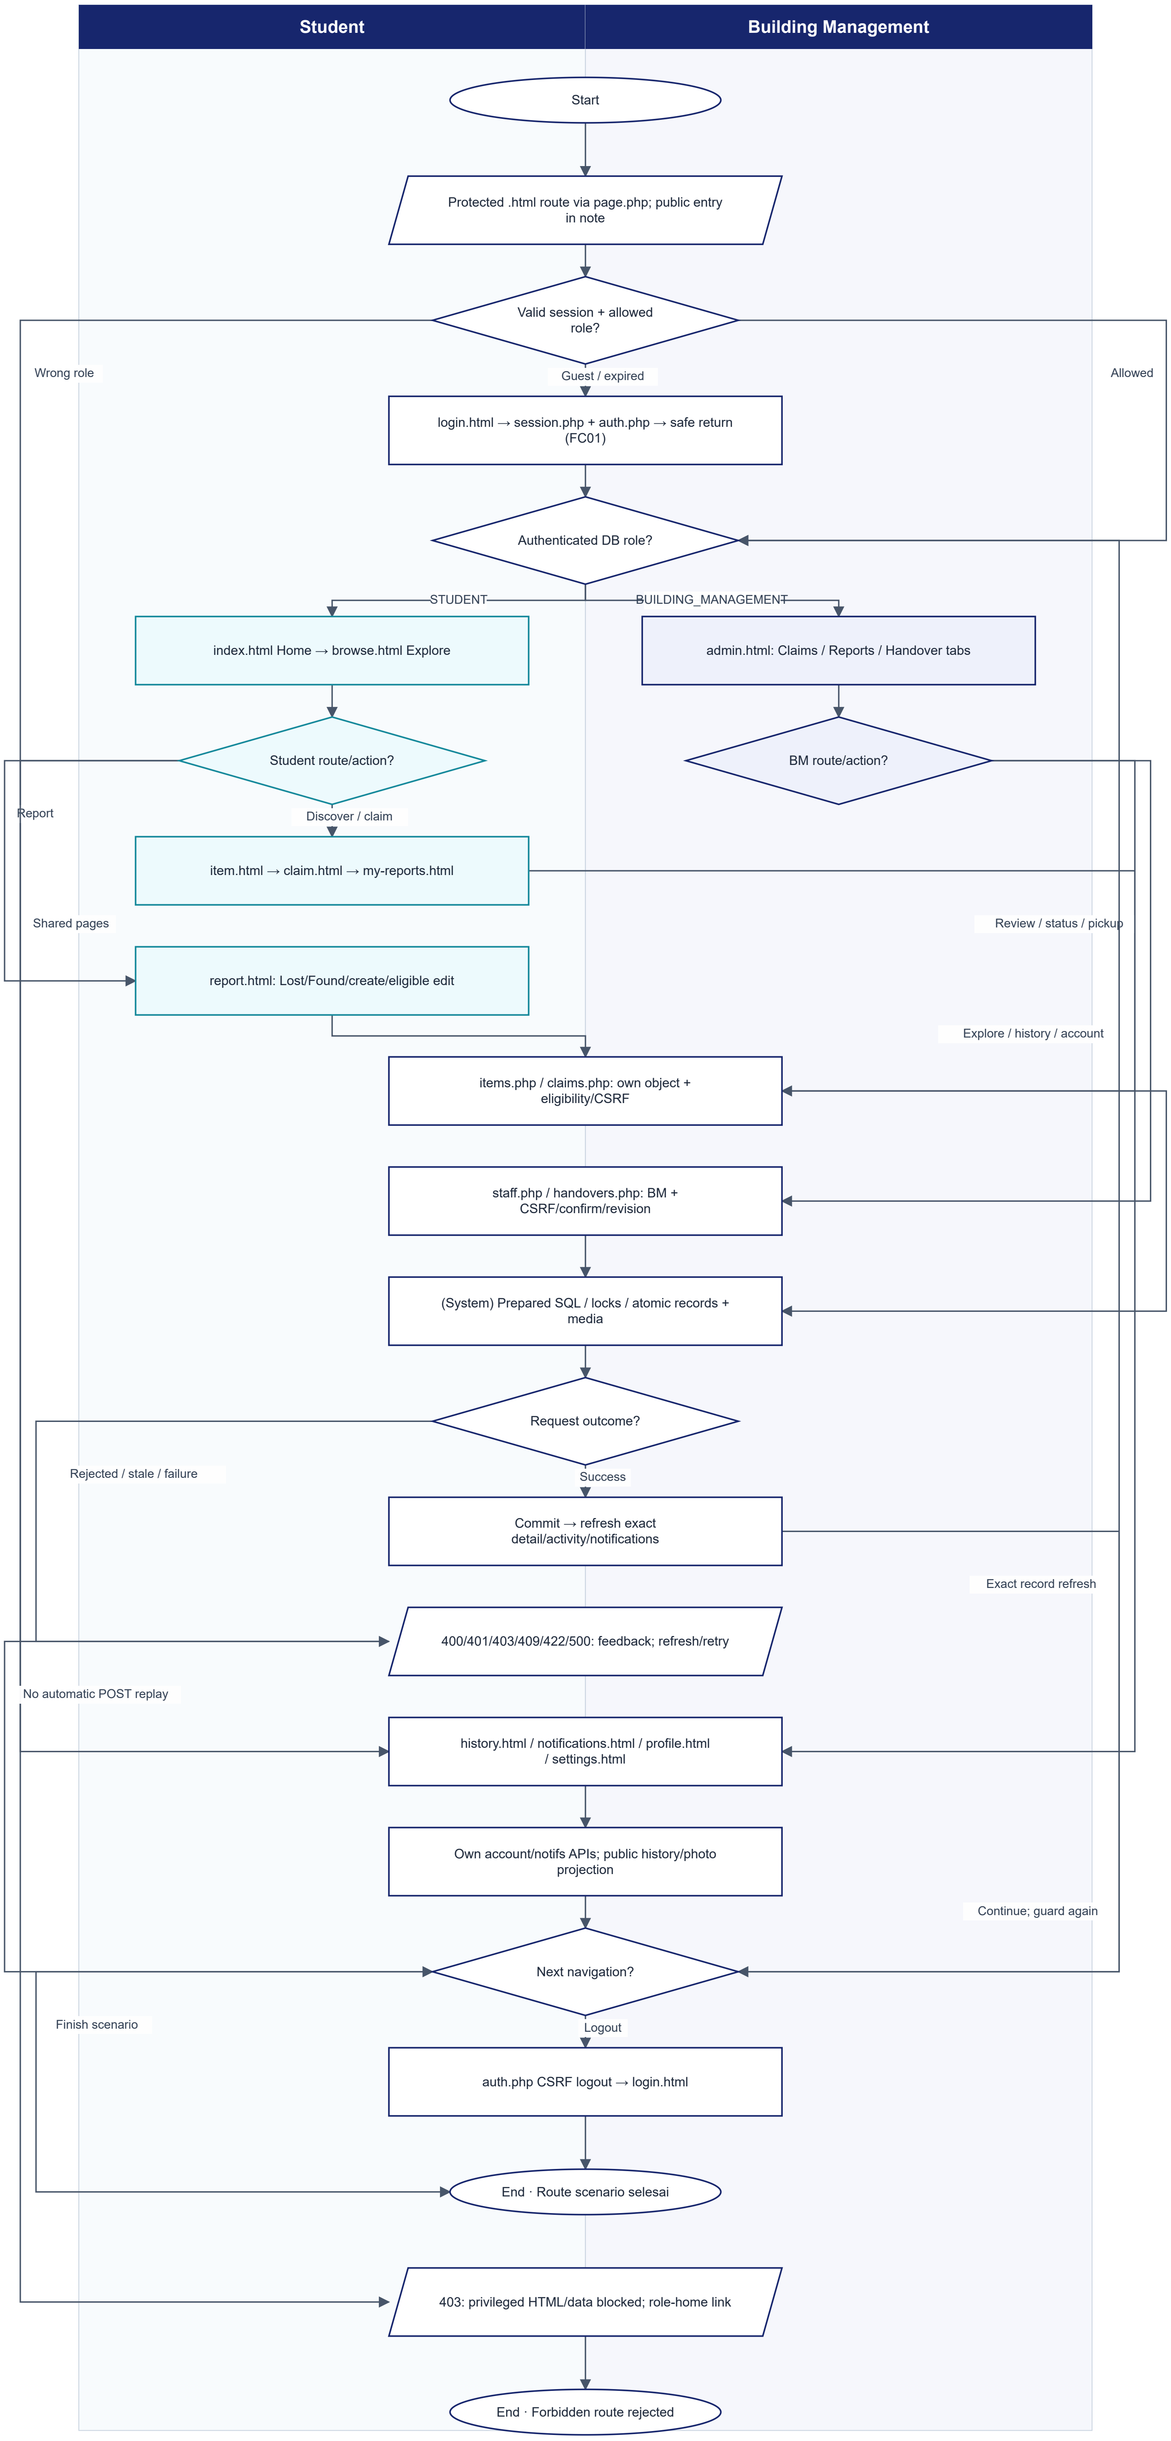

As-built / B06 · Goals, actor handoff and outcomes

Goal-level user flow; detailed validation/errors remain FC01–FC06. Cancel appointment retains ownership. BM pickup requires an approved record; report/status eligibility is server-checked.

AF01 · As-built application / route flow

As-built / B06 · Pages, protected endpoints and persistence

Guest index/login are public; Landing Login CTA is voluntary. All12 routes covered; shared Explore uses browse/item. Wrong role403 + role home; expired401/Login. Private API/photo guards precede data; no POST replay.
